The areas around Munseom (Mosquito Islet) and Beomseom (Tiger Islet) are perfect places to enjoy scuba diving because the sea maintains a temperature of 20 degrees all year round with beautiful underwater views.

 **TIP** Anyone can try scuba diving regardless of his/her swimming skills.

**Submarines** A trip to an underwater world

Explore the Jeju ocean where you can see clusters of soft coral right in front of Seogwipo-si, which retains a rare underwater ecosystem. The underwater topography of a volcanic island is unique and memorable.

 **TIP** Take medicine for seasickness if needed.

**Paragliding** Roam through the open air

Experience the thrill of flying like a bird over Jeju's many hills with the cool wind blowing. The view will be like no other while you're on Jeju Island.

 **TIP** Be sure to wear long sleeves and long pants!

**Horse Riding** Race across the vast fields

To travel the large meadows of Jeju freely, horse riding is highly recommended. Feeling the wind while on horseback gives you another taste of Jeju.

 **TIP** Be careful not to stand behind the horse to avoid getting kicked.

In addition to the above, there are also high-speed jet boats, relaxing yachts, parasailing, ATVS, and go-karts that ride across Jeju's green terrain. You can also enjoy hunting for four months from part of November 1 to February.
